

### CATV 1000 MHz Optical Receiver Amplifier Module

## 1. Product profile

### 1.1 General description

High dynamic range optical receiver amplifier module is in a standard SOT115T package where the 0.9mm buffered fiber has an FC/APC or SC/APC connector. The amplifier supply voltage is 24 V (DC). The modules have a single mode optical input suitable for 1290 nm to 1600 nm wavelengths, using a front push-pull amplifier and a cascaded power doubler MMIC with GaAs Technology from USA .adding ESD and surge protective devices.a terminal to monitor the photo diode current and an electrical output having a characteristic impedance of 75Ω.

#### CAUTION

This device is sensitive to Electro Static Discharge (ESD).. Therefore care should be taken during transport and handling.

### 1.2 Features and benefits

- Large range of optical power input
- Excellent linearity
- Low noise
- Excellent flatness
- Standard CATV outline

### 1.3 Applications

- CATV optical node systems operating in. the 40 MHz to 1000 MHz frequency range.

### 1.4 Handling

- Fiberglass optical coupling:  
Maximum tensile strength= 5 N;  
Minimum bending radius=35mm.
