

CATV 860MHz Optical Receiver Amplifier Module

1. Product profile

1.1 General description

High dynamic range optical receiver amplifier module is in a standard SOT115T package where the 0.9mm buffered fiber has an FC/APC or SC/APC connector. The amplifier supply voltage is 24 V (DC). The modules have a single mode optical input suitable for 1290 nm to1600 nm wavelengths, using a front push-pull amplifier and a cascaded power doubler MMIC with GaAs Technology from USA .adding ESD and surge protective devices.a terminal to monitor the photo diode current and an electrical output having a characteristic impedance of 75 Ω .

CAUTION

This device is sensitive to Electro Static Discharge (ESD). Therefore care should be taken during transport and handling.

1.2 Features and benefits

- Large range of optical power input
- Excellent linearity
- Low noise
- Excellent flatness
- Standard CATV outline

1.3 Applications

 CATV optical node systems operating in. the 40MHz to 860MHz frequency range.

1.4 Handling

 Fiberglass optical coupling: Maximum tensile strength= 5 N; Minimum bending radius=35mm.
